

Pearl Pressman Liberty Communications Group is proud to use wind power!

Environmental Benefits

The estimated environmental benefit resulting from our 50% commitment to emission-free energy is equivalent to preventing the release of 1,056 metric tons of CO₂ into the atmosphere. This is comparable to: Taking 220 cars off the road or planting 950 acres of trees each year!

As more businesses like ours sign up for wind power, more wind farms will be built!

We're making a difference – so can you!

Our purchase of Renewable Energy Certificates allows wind energy to go into the National Electric Grid which displaces the need for conventional energy sources, such as coal, oil and natural gas.

Be sure to request the wind power logo on the next printing project we produce for your company.
